PROJECTS

Food Order App: Fully responsive website with modern UI in ReactJS. This is restaurant landing page website

Fitness Exercise App: This is modern react 18 fitness exercise app. With functionality to choose exercise categories and specific muscle groups. Browse more than 1000 exercises with practical example and related videos from YouTube.

YouTube Clone App: This is YouTube home page build using Tailwind CSS. There are so many complex interactions that actually make building out this home page design quite complicated.

ANNEXURE

Title	: RadixHR
Tools	: Visual Studio Code
Technologies	: HTML, CSS, Tailwind CSS, JavaScript.
Description	: RadixHR is a tool for managing & automating attendance data management that seamlessly integrates with the payroll systems. RadixHR facilitates the automated calculation of employee payroll, including the computation of Attendance & Overtime, variable pay and deductions. This ensures timely preparation and payment of employee salaries eliminating errors and saving time that could result from Manuel calculations.
